

Author: Martin SMETHERS

Description: 'S' shaped Course - Diagrammatic

3 Minute rolling start sequence.

See information about sound signals that may operate.

The start team will not wait for boats that have not arrived in time for their start, nor will they delay the start at the request of any competitor.

If a boat capsizes before or during a starting sequence, that is not justification to postpone a start sequence.

Competitors should keep clear of the starting area unless they are in the race about to start. Any competitor who, in the view of an umpire impedes a boat that is racing, risks penalisation.
